DESCRIPTORS	*Conference Proceedings; Developed Nations; Developing Nations; Distance Education; *Educational Administration; *Educational Development; *Educational Policy; Foreign Countries; Indexing; International Cooperation; *International Education; International Organizations
IDENTIFIERS	*UNESCO

ABSTRACT

Composed of two sections, this catalog lists 925 documents prepared for and produced by the 37th through the 40th sessions of the International Conference on Education (1979, 1981, 1984, and 1986). Included are reference and information papers contributed by the United Nations Educational, Scientific, and Cultural Organization (Unesco) headquarters units and other institutions; final reports and recommendations to the Ministries of Education on themes from each of the Conferences; and reports on the development of the education systems of individual member states. In the first section, the national reports and replies to questionnaires are listed by country in alphabetical order by the English name of the country. In the second section, the Conference documents--i.e., the working papers and the final report for each session--are listed in chronological order of the session. Entries include the authoring country, conference year, agency or organization from which the document originated, individual author, document title, place of publication, publisher, date of publication, number of pages, questionnaire reference number, and English keyword indexing terms for computer storage and retrieval from the 1984 edition of the "UNESCO: International Bureau of Educaton Thesaurus." The table of contents and introduction appear in English, French, and Spanish; the titles of many of the documents are in the language of the country of origin. (SD)

Introduction

From 1979 to 1986, four sessions of the Intenational Conference on Education were held in Geneva, convened by the Director-General of Unesco and organized by the International Bureau of Education (IBE).

The Conference considered the following items:

Thirty-seventh session, 1979

- Educational policies and trends, with particular reference to how they take account of past experience in education;
- Current major trends in education and the welfare of the child;
- Improvement of the organization and management of education systems as a means of raising efficiency in order to extend the right to education (special theme –›Recommendation no. 72)

Thirty-eighth session, 1981

- Future development of education in the light of global needs and world problems;
- Major trends in education;
- Interaction between education and productive work (special theme – Recommendation no. 73)

Thirty-ninth session, 1984

- Education for all in the new scientific and technical environment and taking into account disadvantaged groups;
- Major trends in education 1981-1983;
- Universalization and renewal of primary education in the perspective of an appropriate introduction to science and technology (special theme – Recommendation no. 74)

Fortieth session, 1986

- Policies and strategies for the development of secondary education;
- Improvement of secondary education: objectives, content, structures and methods (special theme – Recommendation no. 75)
- Initial and continuing training of personnel for secondary education;
- Secondary education in the face of scientific and technological challenges.

Each session produced a large amount of documentation. The replies to the questionnaires, one on major trends, the other on the special theme, served as the principal basis for drafting working and reference papers prepared by the IBE staff. A number of reference and information papers were contributed by Unesco

Headquarter's units and other institutions in order to provide a broader basis for the discussions. In addition, the Conference's deliberations led to the adoption of a *Final report* and a Recommendation to the Ministries of Education on each of the special themes.

Furthermore, most Member States regularly presented national reports on the development of their education systems during the period comprised between two sessions of the Conference. These reports constitute an unparalleled compendium of up-to-date information on the progress of education throughout the world.

The present catalogue includes all the documents prepared for and produced by these four sessions of the Conference, altogether 925 documents indexed by the IBE for computer storage and retrieval. It is presented in two sections. The first comprises the national reports and replies to questionnaires, listed by country in alphabetical order of the names in English. Two tables of contents, in French and Spanish, serve to locate the English name.

The second section comprises the Conference documents – the working papers and the final report for each session – listed in chronological order of session.

* AVAILABILITY

The catalogues of Conference reports, published by the IBE since 1973, as well as the original documents, which have been reproduced on microfiche, are included in the Series of International Reports on Education (SIRE). Interested readers may thus obtain any or all of the items by ordering them directly from the Documentation and Information Unit, International Bureau of Education, P.O. Box 199, 1211 Geneva 20, Switzerland. The price of the microfiches is 1 Swiss franc per fiche for complete collections of a given Conference, and 2 Swiss francs per fiche for individual documents, bearing in mind that some documents cover more than one fiche. To this price should be added the registered airmail costs. Further details may be obtained from the above address.

The designations employed and the presentation of the material throughout this publication do not imply the expression of any opinion whatsoever on the part of the Unesco Secretariat concerning the legal status of any country or territory or of its authorities, or concerning the delimitations of its frontiers or boundaries.

Introduction

De 1979 à 1986, quatre sessions de la Conférence internationale de l'éducation se sont tenues à Genève, convoquées par le Directeur général de l'Unesco et organisées par le Bureau international d'éducation.

La Conférence a traité les questions suivantes:

Trente-septième session, 1979

- Politiques et tendances de l'éducation, compte tenu notamment des modalités d'utilisation de l'expérience acquise en matière d'éducation;
- Principales tendances actuelles de l'éducation et bien-être de l'enfant;
- Amélioration de l'organisation et de la gestion des systèmes d'éducation afin d'accroître leur efficacité et de généraliser ainsi le droit à l'éducation (thème spécial – Recommandation n° 72).

Trente-huitième session, 1981

- Développement de l'éducation dans l'avenir à la lumière des besoins globaux et des problèmes mondiaux;
- Principales tendances de l'éducation;
- Interaction entre éducation et travail productif (thème spécial – Recommandation n° 73).

Trente-neuvième session, 1984

- L'éducation pour tous dans le nouvel environnement scientifique et technique et en tenant compte des groupes désavantagés;
- Principales tendances de l'éducation, 1981-1983;
- Généralisation et rénovation de l'enseignement primaire dans la perspective d'une initiation scientifique et technique appropriée (thème spécial – Recommandation n° 74);

Quarantième session, 1986

- Politiques et stratégies pour le développement de l'enseignement secondaire;
- Amélioration de l'enseignement du second degré, de ses objectifs, de ses contenus, de ses structures et de ses méthodes (thème spécial – Recommandation n° 75);
- Formation initiale et continue des personnels de l'enseignement secondaire;
- L'enseignement secondaire face aux défis scientifiques et technologiques.

Chaque session de la Conférence a donné lieu à la production d'une vaste documentation. Les réponses aux questionnaires, portant, l'un sur les principales tendances, l'autre sur le thème spécial, ont constitué la base essentielle de l'élaboration des documents de travail et de référence préparés par le personnel du BIE. Un certain nombre de documents de référence et d'information ont été fournis par des unités du Siège de l'Unesco et par d'autres institutions afin d'élargir la base des discussions. D'autre part, les délibérations de la Conférence ont abouti à l'adoption d'un rapport final et d'une recommandation aux ministères de l'Éducation sur chaque thème spécial.

En outre, la plupart des Etats membres ont régulièrement présenté des rapports nationaux sur le développement de leurs systèmes d'éducation pendant chaque période comprise entre deux sessions de la Conférence. Ces rapports constituent un recueil unique d'information très récente sur les progrès de l'éducation de par le monde.

Le présent catalogue recense tous les documents préparés en vue de ces quatre sessions de la Conférence ou émanant de celles-ci, soit 925 documents indexés par le BIE en vue de leur mise en mémoire et de leur recherche documentaire sur ordinatuer. Il comprend deux sections. La première est consacrée aux réponses aux questionnaires et aux rapports nationaux, énumérés par pays et par ordre alphabétique des noms en anglais (deux tables des matières, en français et en espagnol, assurent la correspondance avec les noms en anglais). Une deuxième section est consacrée aux documents de la Conférence elle-même (documents de travail et rapport final pour chaque session), énumérés dans l'ordre chronologique des sessions.

Les catalogues consacrés aux rapports de conférences publiés par le BIE depuis 1973, ainsi que les documents originaux qui ont tous été reproduits sur microfiches, figurent dans la Série internationale de rapports sur l'éducation (SIRE). Les lecteurs qui s'y intéressent peuvent ainsi obtenir ces documents en les commandant soit en totalité, soit séparément, en s'adressant directement à l'Unité de documentation et d'information, Bureau international d'éducation, C.P. 199, 1211 Genève 20, Suisse.

Le prix des microfiches est de 1 franc suisse par fiche pour des collections complètes par Conférence, et de 2 francs suisses par fiche pour des documents isolés (certains documents occupant plus d'une microfiche). A ce prix il convient d'ajouter les frais d'envoi par avion en recommandé. De plus amples détails peuvent être obtenus à l'adresse figurant ci-dessus.

Les appélations employées et la présentation des données qui figurent ici n'implique de la part de l'Unesco aucune prise de position quant au statut juridique des pays, territoires, villes ou zones, ou de leurs autorités, ni quant à leurs frontières ou limites.

Introducción

Entre 1979 y 1986 se han celebrado en Ginebra cuatro reuniones de la Conferencia Internacional de Educación, convocadas por el Director General de la Unesco y organizadas por la Oficina Internacional de Educación.

La Conferencia trató los siguentes temas:

37a. reunión, 1979
- Políticas y tendencias de la educación, habida cuenta, en particular, de las modalidades de utilización de la experiencia adquirida en materia de educación;
- Las principales tendencias actuales de la educación y el bienestar del niño;
- La mejora de la organización y la gestión de los sistemas de educación, a fin de aumentar su eficacia y generalizar el derecho a la educación;

38a. reunión, 1981
- Desarrollo futuro de la educación a la luz de las necesidades globales y de los problemas mundiales;
- Tendencias principales de la educación;
- Interacción entre la educación y el trabajo productivo;

39a. reunión, 1984
- La educación para todos en el nuevo medio científico y tecnológico, habida cuenta de los grupos desfavorecidos;
- Tendencias principales de la educación: 1981-1983;
- Generalización y renovación de la enseñanza primaria en la perspectiva de una iniciación científica y técnica apropiada.

40a. reunión, 1986
- Politicas y estrategias para el desarrollo de la enseñanza secundaria;
- El mejoramiento de la enseñanza secundaria, de sus objetivos, contenidos, estructuras y metodos;
- Formación inicial y permanente del personal de la enseñanza secundaria;
- La enseñanza secundaria frente al desafío científico y tecnológico.

Cada reunión dió lugar a la produción de una vasta documentación. Las respuestas a los cuestionarios, referentes uno a las principales tendencias y otro al tema especial, constituyeron la base esencial para la elaboración de los documentos de trabajo y de referencia preparados por el personal de la OIE. Cierta cantidad de documentos de referencia y de información fueron suministrados por unidades de la sede de la Unesco y por otras instituciones, lo que permitió ampliar las bases de discusión. Las deliberaciones de cada reunión de la Conferencia concluyeron con la adopción de un Informe final y de una Recomendación a los Ministerios de Educación sobre el tema especial.

Además, la mayor parte de los Estados Miembros presentaron regularmente informes nacionales sobre el desarrollo de sus sistemas de educación durante el periodo comprendido entre dos reuniones de la Conferencia. Estos informes constituyen una collección única de información al día sobre los progresos de la educación en el mundo entero.

Este catálogo abarca todos los documentos preparados para las cuatro precitadas reuniones de la conferencia y los que produjeron éstas, o sea 925 documentos indizados por la OIE para poder almacernarlos en el ordenador y facilitar así su localización. El catálogo comprende dos secciones. La primera sección está consagrada a las respuestas a los cuestionarios y a los informes nacionales, enumerados por país en el orden alfabético de la denominación en inglés (dos índices, en francés y en español, establecen la correspondencia con los nombres en inglés). La segunda sección está dedicada a los documentos de la Conferencia propiamente dichos (documentos de trabajo y el Informe final de cada reunión) enumerados en el orden cronológico de las reuniones.

Los catálogos de los informes de Conferencia publicados por la OIE desde 1973, así como los documentos originales, que han sido sin excepción reproducidos en microfichas, figuran en la Serie Internacional de Informes sobre Educación (SIRE). Los lectores interesados pueden obtener estos documentos pidiéndolos, en conjunto o separadamente, a la Unidad de Documentacion y de Información, Oficina International de Educación, C.P. 199, 1211 Ginebra 20, Suiza. El precio de las microfichas es de 1 franco suizo por ficha para las colecciones completas por Conferencia y de 2 francos suizos por ficha para cada documento separado (algunos documentos ocupan más de una microficha). A ese precio hay que agregar los gastos de envío por correo aéreo recomendado.

Mas detalles pueden requerirse a la dirección preindicada.

Los designaciones empleadas y la presentación adoptada en este catálogo no deben interpretarse como una toma de posición de la Unesco sobre el estatuto jurídico o el régimen de cualquier país o territorio, ni sobre sus límites o fronteras.
